## Calibrations

### ELECTRONICS

Panel Meters  
Multi-Meters  
Counters  
Loop Calibrators  
Meg-Ohmmeters  
Oscilloscopes  
Signal Generator  
Voltmeters

### TEMPERATURE

Temp. Controller  
Thermometers  
Chart Recorder  
Probes  
Ovens  
Viscometers

### PRESSURE

Gauges  
Vacuum  
Transducers

### TORQUE

Wrenches  
Runners  
Multipliers

### PHYSICAL/ DIMENSION

Calipers  
Gage Blocks  
Hardness Tester  
Micrometers  
Plug Gages  
Ring Gages  
Surface Plates  
Thickness Gages  
Thread Wires

### MASS / FORCE

Weights  
Force Gages  
Dynameters

## Quality Statement

*The mission of Alabama Scale & Instrument, Inc. is to provide calibration services in a timely and efficient manner to our clients.*

*Our vision is to be recognized as a leader in achieving technical excellence and to be our clients' best resource.*

To this end, the management is dedicated to the encouragement of excellence in every aspect of our operations.

## Equipment Sales

Scales · Pressure · Torque · Temperature · Electronics

AS&I has aligned itself with major manufacturers which allows us to bring the best products and competitive pricing to our customers.

### Pressure

### Temperature

Certificate No.  
1876.01

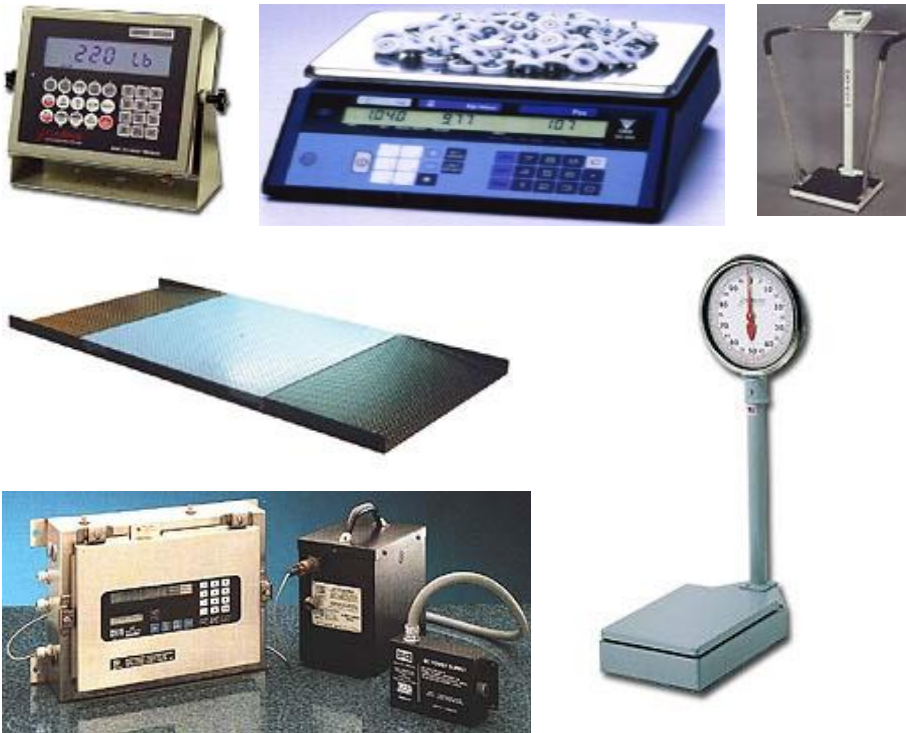

AS&I is an A2LA accredited lab

We can provide NIST traceable calibration services to the ISO/IEC 17025 & ANSI/NCSL-Z540 standards. Being accredited by A2LA assures our customers receive the highest level of calibration.

AS&I is a one stop measurement stop.

- Quality instruments
- Quality calibrations
- Competitive pricing

## Scales

## Force & Material Testing

## Electronics

## Equipment

Truck Scales  
Railroad Scales  
Floor Scales  
Tank Scales  
Lab Balances  
Counting Scales  
Physician Scales  
Infant Scales  
Wheelchair Scales

Pressure Gauges  
Diaphragms  
Fittings

Bi-Metal Thermometers  
Glass Thermometers  
Digital Thermometers  
Temperature Controllers

Torque Wrenches  
Torque Tools  
Torque Calibration Systems

Multi-meters  
Power Supplies  
Clamp-On Meters  
Meggers  
Anemometers  
O-Scopes  
Data Loggers  
Calibrators

## What's so special about Alabama Scale & Instrument, Inc.?

### 1. Experience.

After 30+ years of serving the industrial market, we have more hands-on experience with more measurement applications than almost any other company.

### 2. We sell what we service!

Yes, that sounds backwards. What we sell is based on our service experience. Therefore, we don't sell based on price alone, it is based on accuracy, reliability, durability and service life. *Try getting that from a catalog.*

### 3. An A2LA accredited lab.

A lot of companies can say they are ISO or provide "NIST" calibrations. ISO doesn't prove that a lab is competent to perform the calibration, just that it has a registered quality system. As for "NIST traceable" calibrations, where is the proof? How do you know they have an unbroken chain of traceability back to NIST? ***THIS*** is why being A2LA accredited is so important. Our Scope of accreditation shows you what we are competent to calibrate. AS&I is assessed by auditors with vast metrology experience. And, only A2LA or NAVLAP accredited labs are recognized internationally by governing bodies from Europe to Asia. Simply stated, we provide the proof that we do it right. Don't take our word for it.

### 4. One of the broadest scopes of accreditation of ANY accredited lab in America!

There are hundreds of accredited labs, but our scope ranges from electronic instrument, to pressure, to temperature, to torque, to heavy capacity scales, and more. Many labs focus on single disciplines. Our focus is on most of the disciplines important to a manufacturing facility. This allows us to serve as a "One stop" measurement center for our customers. If we don't calibrate the instrument ourselves, we send it to an associate lab that is accredited. This reduces administrative costs for our customers.

### 5. Our people!

Our associates are competent, courteous and caring. We have one overriding rule:  
The Golden Rule.
